Whether you're considering new assessment tools, digital projectors, or network security products, it pays to know what's on the cutting edge of educational technology. *Technology & Learning* has gathered dozens of new products that could help your school or district perform better and satisfy those important mandates.

ClassLink

A new software package, ClassLink OnTrack, combines a curriculum mapping tool with an electronic portfolio of student achievement, assessment, and feedback, all designed to help teachers, administrators and parents review students' portfolios and appropriately support learning. The package is being offered with a free weekly Webinar.

A screenshot of the ClassLink web application interface, displayed in a Microsoft Internet Explorer browser window. The browser's address bar shows the URL: http://10.10.20.9/Common/Layout/index.asp?dID=1. The page title is "Curriculum - ClassLink - Learning Experience". The interface features a navigation menu with tabs for Home, Curriculum, Libraries, Activities, Plans, Portfolio, and Forums. A search bar is located on the left side. Below the search bar, there is a "Recently Viewed" section listing items like "**Grade 4", "Evaluation of Ar...", "**Mathematics", "**Statistics and...", and "Information Lite...". The main content area displays a "Read Only" view for "**Grade 4", with a location of "curriculum>**Grade 4". It includes sections for "Standards", "Units of Study", "Key Concepts", "Resources", "Implementation", "Activities", "Assessment", and "Submitted Lessons". At the bottom, there are fields for "Full Name" and "User Name". The browser's status bar at the bottom shows "Done" and "Internet".
