

ClassLink Universal Learning Suite

Universal Learning Environments

- Where students, teachers, parents and administrators are seamlessly connected to the applications they need and to each other through a single desktop interface
- Maximizes a school district's investment in, and management of, educational technology
- Enables communication, collaboration, creation, assessment and reporting in support of student achievement

ClassLink provides K-12 schools with educational technology management solutions that create Universal Learning Environments.

The Universal Learning Suite supports Universal Learning Environments by seamlessly integrating and delivering education, assessment, and reporting applications to the desktop. Schools can fully maximize their IT and instructional technology investments with a solution that includes technology agnostic, education-specific IT management capabilities, collaborative teaching and learning tools, and assessment and reporting tools.

The Universal Learning Suite is comprised of three modules that form the foundation of the Universal Learning Environment. The Universal Learning Suite modules include:

- **CLiC** - the tool for managing your ClassLink System 2000 Universal Learning Environment with just one CLiC
- **OnTrack** - an authentic assesment solution for the ClassLink Universal Learning Environment
- **LaunchPad** - the gateway to your ClassLink Universal Learning Environment

ClassLink Universal Learning Suite:

- Gives schools and school districts total control over how, when, and where technology and education interact
- Connects teachers and students to the applications they need - and to each other - through a single desktop interface
- Operates on an IT management system that affords a low total cost of ownership
- Places basic IT controls in the hands of teachers and administrators
- Is the most user-friendly IT management solution available in the education technology marketplace
