

Overview of CL-102: Introduction to ClassLink Information Console

Course Description:

ClassLink Information Console or “CLiC” empowers IT staff to centrally deploy and monitor applications across the entire district and to the home. Now schools can manage and monitor many more workstations than before and provide 24/7 access to students and staff. One of the major benefits of CLiC is that you can easily manage and customize your entire ClassLink environment from one interface. The ClassLink Suite is jammed packed with features that can be configured from anywhere at anytime.

Course Goals/Objectives:

- Learn how to have access to Information Console from anywhere at anytime
- Review the robust features available to network administrators
 - Manage software licenses to ensure compliance
 - Easily track all logins, print jobs, and interactions
 - Specify which printers are available to users from any location
 - Quickly deploy new applications by simply dragging and dropping them onto themes
 - Run reports as needed on usage
- Hands on experience to explore each feature

Materials:

To participate in this course, you will need the following:

- Information Console connected computer
- Information Console username and password
