

Overview: Introduction to ClassLink Inquiry

Course Description:

ClassLink Inquiry takes the guesswork out of your instructional technology decisions. By providing administrators with comprehensive and customizable real-time software and hardware utilization reports, Inquiry empowers administrators to make more informed and strategic tech decisions for their schools. ClassLink Inquiry accumulates, organizes and analyzes data in an instructional context, and is the only software that allows administrators to combine technology usage data with student grades and attendance; correlating technology usage into instructional results!

Course Goals/Objectives:

- Learn how to have access to Inquiry from anywhere at anytime
- Review the robust features available to administrators
 - Compile and organize software usage data
 - Stay actively informed of technology utilization
 - Run reports on specific computers
 - Run reports that compare computer usage across the district
 - Run reports on software and website usage
 - And much more...
- Hands on experience to explore each feature

Materials:

To participate in this course, you will need the following:

- Internet connected computer
- Inquiry username and password
