

# LaunchPad™ Full Feature List

brought to you by ClassLink

*Cloud desktop for education*

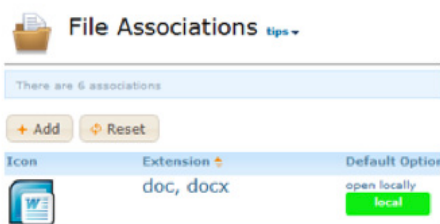

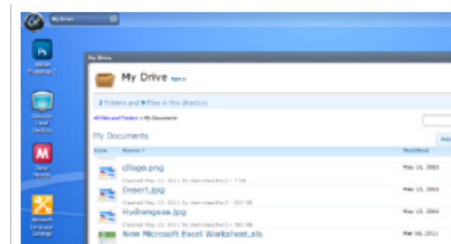

## Overview

ClassLink LaunchPad™ is the first K-12 cloud-based desktop that gives teachers and students access to all their applications and files for anywhere, anytime availability. The only requirement is an Internet connection. We keep it that simple for teachers and students to login to their customized desktop and reach all their resources, no matter where they are! The devices are unrestricted too! Whether they work on a PC desktop at school, or a Mac laptop at home, even from a tablet or Smartphone – the ability to connect in real time is here.

### *Cloud Based Desktop*

LaunchPad is completely Cloud Based meaning you can run it from ANY web browser with NOTHING to install. Quite simply, LaunchPad is a website that emulates a desktop experience from any device!

Why not try it now for yourself to see the future of instructional technology?

### *Edit Documents in the Cloud or Locally*

You choose how you want to edit your documents. Want to use built in web based office document editors? Sure thing! Nothing to install, its just a web page! Edit Powerpoint, Excel and Word docs without installing anything!

Want to edit your documents locally and save them in the cloud? No problem! The choice is yours! Each user can specify the default editor for their documents.

### *Run Windows Applications, Anywhere, Any Device*

Included with LaunchPad is a powerful java based RDP client that allows you to run hosted Windows based applications from any java enabled device. Mac, PC, Unix, doesn't matter! Home, school, work or on vacation, sure thing!

If your school already has terminal servers then you are half way there!

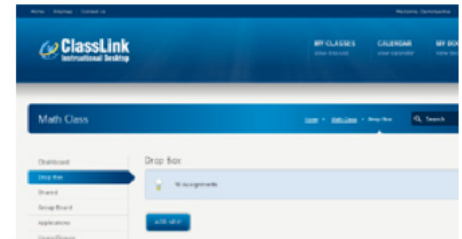

## Overview continued

### *Multiple Views, Desktop or Instructional*

We know how important it is to have multiple ways to access your data and deliver content to your users, namely instructional content. LaunchPad has an option to deliver an instructional desktop view to your users which is class/instruction driven.

Create classes, deliver instruction, whiteboards, drop boxes, collaboration and more!

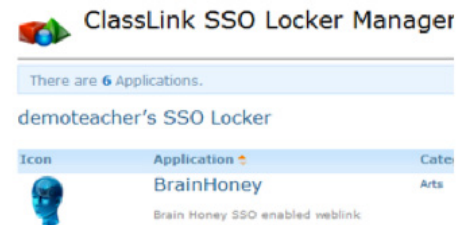

### *Classroom Management (coming soon!)*

Agentless classroom management on any java enabled device! That's right, take control of your devices and classrooms with our agentless classroom management. Nothing to install but now you can empower your teachers with the tools they need to effectively manage their classrooms.

Screenshot, Lock, Observe, Push and more!

### *Single Sign On (SSO)*

Many websites have their own usernames and password. Keeping up with all of them is a full time job by itself. LaunchPad allows you to save your credentials for your favorite websites! Automatically log into your resources with a single mouse click.

## LaunchPad Virtual Desktop

LaunchPad has multiple views available to your users, Instructional and Virtual Desktop. The virtual desktop provides users with a familiar desktop experience where they can access their files, applications and browse the web.

### *Virtual Cloud Desktop*

- » Runs in your existing web browser
- » Supports all major web browsers
- » No need for massive infrastructure investments like VDI
- » Virtual web browser

### *Local Application Launch and Edit of Cloud Documents*

- » Manage file associations
- » Local application launch
- » Local edit of cloud documents

### *Cloud Drive*

- » Secure cloud storage (need more storage? no problem!)
- » Download documents
